

Create a Project:

To create a project on the Google Cloud Platform, follow the below steps:

Step 1: The screen that you see is the Dashboard of your console.

Step 2: To create a new project, or open an existing one, click on the 'Select a project' option.

Step 3: A list of previously created projects appears under RECENT or ALL. Click on NEW PROJECT to create a new one.

Machine learning

Step 8: Select the required API from the API Library displayed for implementing it into the application and follow the instructions for implementing specific API and Services for any device.

At this stage, you have a Google cloud console account and a new API or server enabled project on GCP to start up.
