Microsoft Interview Experience for full time position of Software Engineer at Bangalore

- Difficulty Level : [Medium](#)
- Last Updated : 04 Mar, 2020

My interview was scheduled by some consultancy. I reached Microsoft Bangalore office 15 minute prior than scheduled time.

I couldn't clear interview but the question they asked i am mentioning here.

Round 1:

- > Design SmartPointer Class.
- > Implement queue using two stacks.
- > Sort a given array
- > Depth of the Tree.

Round 2:

- > Given a binary 2D matrix; sort the matrix row wise without converting binary value to decimal
- > Given an unsorted array, find an element in the array which is binary searchable. (if binary search algorithm applied on unsorted array then that element should be found.)

Round 3:

- > Design MS Paint application.
