## Microsoft Interview Experience (On- Campus)

- Last Updated :15 Sep, 2020

**Round 1:** It was an online test with 3 coding problems. All the problems that Microsoft asks are available as far as I know.

1. It was an easy matrix problem.
2. Dice Throw Problem (DP)
3. The Longest contiguous sum subarray problem(DP)

Those who did all three problems were selected for the next round.

I was one of them. But unfortunately, the company canceled its further process as there were few policies of college which company didn't like.

So, this was my experience.
