

## Microsoft Codess Interview Experience

- Last Updated : 07 Sep, 2020

In the month of March, I gave an online competition called Codess. It had some basic questions on DSA(linked list, queues, stacks, heaps). These were MCQs so you should be clear with basic concepts in DSA.

**Engage-2020:** When I cleared the Codess, I got into Engage 2020 which is a mentoring program organized by Microsoft. It had two projects from which we had to complete one project.

I had Tic-Tac-Toe with AI agents. In this, we used JavaScript to use the recursive functions. You can refer to the code from the link given below.

<https://github.com/nitya2602/tic-tac-toe>

We had a great experience doing the project under our mentor allotted by Microsoft.

**Interview:** Then, we got our interview scheduled.

It was a half an hour interview. He first asked me to introduce myself, so I told him about my few projects so we discussed one of them for 10 min. Then rest of 20 min he asked a coding question:

1. [Write to Rearrange characters in a string such that no two adjacents are the same.](#)

**Tips:** Try to solve as many questions as possible for the interview and be interactive with the interviewer.
