Amazon Interview Experience

- Difficulty Level :\n[Easy](#)
- Last Updated :\n14 Dec, 2021

Round 1(Online Test):

- Debugging: 7 easy debugging questions
- Question-based on the tree. The difficulty level was medium-hard.
- Question-based on sorting. The difficulty level was easy-medium.
- 45-50 workstyle based assessment
- General Aptitude: 24 questions of varying difficulty levels.

Technical Interview Round 1:

- [Zig-zag traversal of a given binary tree.\xc2\xa0](#)
- [Lowest common ancestor of a given n-ary tree](#)

Technical Interview Round 2:

- [Check if a given binary tree is a valid BST](#). I was asked not to use inorder traversal. So I told him an approach using INT_MIN and INT_MAX which got accepted.
- [Given a stream of integers, find the top K most frequent integers](#).
